

CLINICAL AND AUTOPSY CASE WORKFLOW PIPELINES

PART A – CLINICAL FORENSIC CASE PIPELINE

Step 1: Patient Referral

Sources:

- Hospital Ward
- Police Station
- Attorney General's Department
- Human Rights Commission
- Other authorities

Data to Store

- Case ID
 - Referral source
 - Referral date/time
 - Referring officer
 - Institution details
 - Referral documents
-

Step 2: Legal Authorization Verification

Required Documents:

- MLEF
- Court Order
- Request Letter

Data to Store

- Authorization document number
 - Document type
 - Issuing authority
 - Issue date
 - Scanned copy
-

Step 3: Patient Registration

Data to Store

Patient Information:

- Full name
- NIC/Passport number
- Age
- Sex/Gender
- Address
- Telephone number

Administrative Information:

- Hospital number
 - Ward number
 - Police station
 - Case number
 - Examining doctor
-

Step 4: Clinical Examination

Data to Store

History:

- Incident description
- Alleged assault details
- Date/time of incident
- Previous medical history

Examination Findings:

- General examination findings
 - Injury descriptions
 - Body diagrams
 - Mental status findings
-

Step 5: Photograph Collection

Data to Store

- Photograph ID

- Photograph category
 - Capture date/time
 - Photographer
 - Description
 - Digital image
-

Step 6: Investigations

Examples:

- X-ray
- CT scan
- Toxicology
- Swab analysis

Data to Store

- Investigation type
 - Request date
 - Laboratory
 - Result date
 - Findings
 - Attached reports
-

Step 7: Specialist Referrals

Examples:

- Psychiatry
- Paediatrics
- Obstetrics & Gynaecology

Data to Store

- Referral specialty
 - Referral date
 - Consultant name
 - Referral report
 - Recommendations
-

Step 8: Review Visits

Data to Store

- Review date
 - Review findings
 - Additional injuries
 - Follow-up recommendations
-

Step 9: Medico-Legal Report Generation

Outputs:

- Police copy of MLEF
- MLR

Data to Store

- Report number
 - Report issue date
 - Final opinion
 - Report file
 - Issuing doctor
-

Step 10: Report Issuance

Data to Store

- Recipient details
 - Date issued
 - Method of delivery
 - Certificate of receipt
 - Signature acknowledgement
-

PART B – AUTOPSY CASE PIPELINE

Step 1: Death Notification

Sources:

- Hospital Death
- Outside Death

- High Profile Death

Data to Store

- Notification source
 - Date/time
 - Informing officer
 - Place of death
-

Step 2: Inquest/Court Authorization

Required Documents:

- Inquest order
- Court order

Data to Store

- Order number
 - Issuing authority
 - Date issued
 - Scanned copy
-

Step 3: Deceased Registration

Data to Store

- PM number
 - Name/Unknown identifier
 - Age
 - Sex
 - NIC (if available)
 - Address
 - Date/time of death
 - Place of death
 - Police station
 - Investigating officer
-

Step 4: Pre-Autopsy Information Gathering

Sources:

- Crime scene

- BHT
- Family statements
- Witness statements
- Police statements

Data to Store

- Scene observations
 - BHT documents
 - Witness statements
 - Police statements
 - Family history
 - Relevant medical history
-

Step 5: Body Reception

Data to Store

- Date/time received
 - Receiving officer
 - Condition upon arrival
 - Identification status
-

Step 6: Postmortem Examination

External Examination:

- Clothing details
- Identification marks
- Injuries

Internal Examination:

- Organ findings
- Pathological findings

Data to Store

- Audio recordings
 - Dictation transcripts
 - PM findings
 - Organ descriptions
 - Injury descriptions
 - Time since death estimation
-

Step 7: Photograph Management

Data to Store

- Crime scene photographs
 - Autopsy photographs
 - Metadata
 - Photographer details
-

Step 8: Ancillary Investigations

Examples:

- Histology
- Toxicology
- Radiology
- Blood analysis

Data to Store

- Sample details
 - Laboratory details
 - Test requests
 - Results
 - Reports
-

Step 9: Cause of Death Determination

Data to Store

- Immediate cause of death
 - Antecedent causes
 - Manner of death
 - Natural
 - Accidental
 - Suicidal
 - Homicidal
 - Certifying doctor
-

Step 10: PMR Generation

Data to Store

- PMR number
 - Report date
 - Final opinion
 - Generated PMR document
-

Step 11: Court Communication

Data to Store

- Court summons
 - Request letters
 - Court dates
 - Court responses
-

Step 12: Report Issuance and Archival

Data to Store

- Recipient information
 - Date issued
 - Receipt certificate
 - Archived copies
 - Access history
-

Suggested Database Modules

1. User Management
2. Patient Management
3. Deceased Management
4. Clinical Case Management
5. Autopsy Case Management
6. Investigation Management
7. Document Management
8. Media Repository
9. Report Management
10. Court Management
11. Notification System
12. Audit Logging

13. Research Repository
